

Providence™ Eastern Red Cedar

Juniperus virginiana 'Providence'

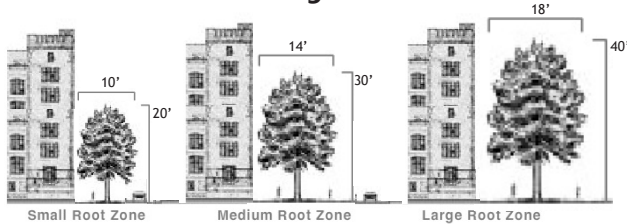

Native evergreen tree - own root. An attractive cultivar of Eastern Red Cedar, the Providence™ Eastern Red Cedar is an excellent selection with a root system and transplantability far more superior than most other cultivars of *J. virginiana* that we have seen. Discovered in Athens, GA, Providence™ is a very dense, broad-base native replacement for Leyland Cypress and Cryptomeria, good as a grouping or screening plant.

Specifications
