Select SustainablePlus Highpoint® Nuttall Oak
Quercus nuttallii 'QNFTA' P.P.#13524

Native shade tree - own root. The first cultivar Nuttall Oak available on its own root. Leaves emerge in spring, tinged bronzy red, turning to lustrous dark green. By fall they assume a brilliant yellow/orange and drop cleanly in winter. “Highpoint® Nuttall Oak is an alternative to Pin Oak and Shumard Oak in the southern United States. The uniform growth habit, spectacular foliage, and proclivity for harsh cultural conditions are the ingredients that produce the perfect shade and street tree.” - Dr. Michael Dirr

**Specifications**

“I was thoroughly impressed by all operations and the professional care taken by Select Trees. The research and product development dedicated to healthy, vigorous root growth is especially significant. Select Trees is an institution and game-changer in the industry, and your beautiful trees are testaments to this.”
